

Press Release

"NFFT2026_AI x CAT x FASHION . Living with Cats"

A 3-Day Event from Feb 6-8.

31 World-Class AI Creators Unveil the Latest AI Films

The evolution of AI technology bridges the gap between cats and cutting-edge fashion. A world-renowned celebration of AI creativity arrives at Harajuku's new cultural landmark, "**Harakado 3F BCBC GALLERY**," perfectly timed for February's "Cat Day" season.

Miho Kinomura launched "NFFT (New Future AI Fashion Technology)" in 2022 to showcase the forefront of AI fashion technology. Following successful physical exhibitions in Tokyo and Cannes, France, the project returns for its 12th AI FASHION MOVIE event.

"**NFFT2026_AI x CAT x FASHION Living with Cats**" will be held for three days from Friday, February 6, to Sunday, February 8, 2026, at BABY THE COFFEE BREW CLUB GALLERY (Harakado 3F, Tokyu Plaza Harajuku).

This Digital AI Fashion Movie exhibition brings together the latest works from 31 globally active AI Creators (AI Prompt Directors/AI Filmmakers), showcasing the pinnacle of world-class AI artistry.

The main theme of this exhibition is "**CAT FASHION LIFESTYLE**." Experience the unique worldviews and AI-driven fashion expressions crafted by each creator. The visuals and music are produced entirely using the latest AI technology, with each film (under 2 minutes) showcased on digital monitors throughout the venue.

Sponsors

TYO Inc.

TYO Inc. has been a sponsor and executive committee member of NFFT since its inception in 2022. In partnership with STUDIO D.O.G GK, TYO has continuously supported digital creators and artists through this project. Last year, TYO and STUDIO D.O.G GK entered into a strategic business alliance and have already established a proven track record of utilizing generative AI in advertising video production. In 2026, the two companies will further strengthen their collaboration to apply rapidly evolving generative AI technology beyond the advertising sector, providing a comprehensive support system for diverse client needs. Additionally, TYO has launched an internal AI R&D project; Satoshi Wada, a key member of this project, will participate in the exhibition as an AI creator.
